

JIBREAL ID-DEEN

Washington, DC | Phone: 215-267-8881 | Email: jibrealiddeen6@gmail.com | LinkedIn: linkedin.com/in/jibreal-id-deen

OBJECTIVE

Seeking an internship/co-op or entry-level role in networking or IT support. I want to apply hands-on lab experience in system administration, troubleshooting, and network security basics, and keep building strong documentation skills.

EDUCATION

Rochester Institute of Technology (RIT/NTID) — Rochester, NY

AAS, Applied Computer Technology (Information & Computing Studies) | Expected May 2026

- **Concentration:** Networking and Cybersecurity | Term GPA: 3.73
- **Coursework:** Fundamentals of System Administration, Network Security, LAN/WAN Design

SKILLS

Networking: TCP/IP, subnetting, VLANs, DHCP/DNS, NAT, routing (RIP/RIPv2, BGP) | Systems: Windows 10/11, Windows Server 2019/2022, Active Directory, Group Policy; Linux (Ubuntu, Kali) | Virtualization: Proxmox, VMware, Hyper-V | Tools: Wireshark, Nmap

EXPERIENCE

Information Technology Intern — Pennsylvania School for the Deaf, Philadelphia, PA | Feb 2023 – Aug 2023

- Installed and configured desktops/laptops and peripherals; supported end users.
- Troubleshot hardware/software and basic TCP/IP connectivity issues; documented fixes.

ACADEMIC PROJECTS

Special Topics: Cyber Attack & Defense Techniques — 2026 (Ongoing)

- Identified and classified assets; performed basic threat modeling in structured lab environments.
- Scanned hosts using Nmap to identify open ports, service versions, and potential vulnerabilities.
- Practiced vulnerability analysis and controlled exploitation in VulnHub lab environments (e.g., SSH misconfiguration scenarios).

FSA Major Project Network Lab (Domain + VLAN + Services) — 2025

- Planned IP scheme and VLAN segmentation; implemented trunking and validated connectivity.
- Configured AD DS, DNS, and DHCP; verified joins, logins, and name resolution; troubleshot via logs/PowerShell.

Windows Server 2019/2022 Lab (AD DS + DNS + DHCP + IIS) — 2025

- Built DC services and DHCP scopes/reservations; tested client access and policies.
- Deployed IIS with HTTPS (self-signed) in a lab; reviewed Event Viewer/IIS logs to verify results.

Private AI on LAN (Ollama + OpenWebUI) — 2025

- Deployed a private local AI service and tested model usage on a LAN server/workstation.
- Configured ports/firewall rules and access limits; wrote repeatable setup + troubleshooting notes.

Security Labs (Class / Permission-Based) - 2024

- pfSense Firewall: practiced updates, firewall rules, and traffic control in a controlled lab.
- WEP (Wired Equivalent Privacy): documented why WEP is weak and compared to WPA2/WPA3.
- DoS/DDoS Concepts: tested availability under load and documented mitigation ideas (monitoring, rate limiting).

LANGUAGES

- English (Writing and Reading), American Sign Language (Fluent), Basic Russian Sign Language
